

Accelerate Enterprise Super-Intelligence With Neutrino™

Neutrino is the foundation enterprises trust to build their most advanced AI – any model, any environment and governed by default.

CtrlS Neutrino to the Rescue

Neutrino gives enterprises one AI framework to build, deploy, and scale production-ready AI without vendor lock-in.

Open & Sovereign

Leverage open-source foundations, LangGraph orchestration, data residency control, zero data egress, and pre-configured compliance.

Any Model, Any Environment

Use commercial and open-source models through a single interface, with the flexibility to run on CtrlS cloud, your infrastructure, or hybrid.

Built-In Governance

Ensure every AI decision is logged, traced, and explained with immutable audit trails, PII detection, and real-time policy alerts.

Everything You Need To Build, Deploy & Govern AI

Enterprise Search

Search across data siloes with permission-aware, source-cited retrieval. Leverage 650+ connectors across SharePoint, Drive, S3, databases, and APIs, with answers cited down to the page.

Business Insights

Gain full visibility into every AI decision with built-in governance, including reasoning chains, explainability on every call, immutable audit trails, and real-time policy alerts.

Voice & IVR

Resolve calls with voice automation, and get support for 50+ languages, live transcription, sentiment, and escalation to human agents with full context.

Workflow Studio

Design multi-agent workflows on a visual LangGraph canvas and deploy them as production code. Drag-and-drop prototyping compiles to versioned, CI/CD-ready code.

Multi-Model Router

Route across commercial and open models through one interface with no rewrites when the model landscape shifts. Get support multi-model support with token-optimized, complexity-aware routing.

Unlock More With Neutrino

	Without Neutrino	With CtrlS Neutrino
Compliance & Governance	Add-on with months of remediation	Built-in: RBI, HIPAA, SOX, GDPR, DPDP Act, ISO 27001, and SOC2 Type II
Enterprise Integration	4-5 vendor contracts and custom glue codes	Native connectors for SAP, ServiceNow, SharePoint, Salesforce, and enterprise systems
Model Strategy	Locked to one vendor, with costly migration when models change	Agnostic routing with zero code changes to switch between commercial and open models
Reliability & Optimization	Manual optimization with no unified SLA	Continuous improvement with 24/7 India-based enterprise support
Time to Production	12-20 weeks	2-4 weeks
Pricing Approach	Seat, API, or infrastructure-led pricing	Outcome-based pricing tied to agents, search, and workflows that ship

Proven in Production & At Scale

FinTech Voice	Humanitarian Forms	E-Governance Search	Cloud IT Ops
75% Calls Resolved Without a Human	73% Faster Form Completion	85% Faster Document Retrieval	67% Lower Mean Time To Recovery
50K+ queries/month Multilingual	15,000+ beneficiaries 85K+ submissions/month 97% accuracy	2,500+ institutions 150K+ requests/month Sovereign deploy	40,000+ VMs 175K+ auto-resolved/month RCA in 2 min

Why Choose Neutrino?

 Rated-4 Sovereign AI Infrastructure Built on Asia's largest Rated-4 datacenter network and India's only Rated-4 sovereign GPU cloud.	 Deployment Choice Run it your way with full control on CtrlS sovereign cloud, your own infrastructure, or hybrid
 India-Based Support 24/7 enterprise support with dedicated deployment lead, tailored onboarding, and SLA-backed response times.	 Quantified Impact Move from prototype to production in 2-4 weeks, save ₹1.7-2.5 crore in integration engineering, and ₹65-100 lakh/year in operations.
