

Visible. Governed. Optimized & **AI-Ready.**

Take control of cloud, GPU, AI and infrastructure operations with unified visibility, built-in governance, continuous optimization and sovereign, secure infrastructure.

Move Beyond Managed Infrastructure

VISIBILITY

See utilization, access, cost and workload activity across cloud, GPU and AI from a unified governance layer.

GOVERNANCE

Strengthen Role Based Access Control (RBAC), audit trails, quotas, policy controls, compliance and project-level accountability.

OPTIMIZATION

See utilization, access, cost and workload activity across cloud, GPU and AI from a unified governance layer.

AI-READINESS

Move enterprise AI from pilot to production on sovereign GPU infrastructure with built-in governance.

Full-Stack Services For Every Need

CLOUD, COST & GOVERNANCE

- Cloud Optimize Service
- Accelerated Cloud Platform (ACP)
- Migration as a Service (Hypervisors)
- Private Cloud

RESILIENCE & SECURITY

- DR & DR on Demand
- Backup as a Service (BaaS)
- Security Operations Center (SOC)
- Business Continuity & Recovery

AI & SOVEREIGN INFRASTRUCTURE

- GPU Private Cloud
- Neutrino - Enterprise AI Platform
- Infrastructure as a Service (IaaS)
- Government Community Cloud & Advanced Metering Infrastructure (AMI)
- Community Cloud & Shared Community Cloud

MANAGED OPERATIONS & SUPPORT

- Remote Infrastructure Management (RIM)
- IT Facility Management (ITFM)
- Virtual Desktop Infrastructure (VDI)
- 24x7 Monitoring & Managed Support

Achieve More From Your **Business**

➔ **MAKE BETTER DECISIONS**

Get clear visibility into infrastructure health, workload utilization, security exposure and technology spend.

➔ **STAY IN CONTROL**

Apply consistent governance, access controls, audit trails and compliance across critical environments.

➔ **ACCELERATE AI ADOPTION**

Move AI initiatives forward with secure GPU capacity, governed platforms and production-ready infrastructure.

➔ **IMPROVE EFFICIENCY**

Lower avoidable spend, automate routine operations and align infrastructure performance with business priorities.

The **CtrlS** Advantage

**Rated-4
Infrastructure**

**Sovereign, Secure
& Compliant**

**Frictionless
Migration**

**AIOps & Intelligent
Automation**

**AI-Ready
Infrastructure**

**Sustainable
Operations**

19

Datacenters

370+ MW

Installed Capacity

99.995%

Uptime SLA

9-Layer

Physical Security

Trusted by enterprises across BFSI, healthcare, pharma, manufacturing, government and digital-native businesses.

Discover how CtrlS Managed Services help you run, govern, optimize and secure cloud, GPU, AI and infrastructure operations.
